

AGRETO Tank Counter AgriCounter Load

Applications:

- Electronic load counter for transport vehicles
- Ideal for slurry tankers with level indicator, self-loading wagons and push-off trailers

Technical details:

- Installation directly on the level indicator, on the tailgate or on a moving part
- Detecting the amount of loads with a special counting sequence via changes in position of the counter and monitoring of minimum times
- Setting options for angles and times
- Activation of the hour counting by motion or vibration of the machine
- Display of loads and hours with 11 mm high digits, symbols for status information
- Robust, one-piece plastic housing
- Protection class IP69k (high-pressure cleaner-proof)
- Tamper-proof by lead sealing of the housing screws
- Zeroing, adjustment of settings and change of battery only possible by damage to the lead seal
- Powered by 2 included AAA batteries
- Battery life approx. 3 years
- Dimensions: 93 x 52 x 33 mm (W x D x H)
- Package includes: Counter, 5 lead seals, manual
- State-of-the-art technology Made in Austria
- 5 year warranty

Benefits:

- Simple, universal, reliable load counter
- Exact data recording with modern 3-axis sensor
- Fair billing base by loads and/or working hours according to real use
- Tamper-proof operation without external sensors, no demounting, switching off or zeroing possible by the user
