

IRRIGATION STATIONS

WatchDog Irrigation Stations with WaterScout and Watermark Sensors

- Affordably monitor, compare and evaluate soil moisture levels from two, three, or four user-defined soil depths.
- Includes WatchDog Station and WaterScout Sensors with 20' (6m) cables - save money when purchased as a system
- Micro Stations also include the Protective Sliding Enclosure
- Watermark Stations include Watermark Soil Moisture Sensors with 11' (3.3m) cables
- Add soil moisture sensors to your WatchDog Pup network and see your data on SpecConnect.net
- Add a WaterScout SMEC 300 Soil Moisture/EC/Temp Sensor (*Item 6470-20*) and monitor soil temperature and EC levels
- Requires SpecConnect, SpecWare Basic or Pro software

Watermark Soil Moisture Sensor

Economical way to measure soil moisture tension

- Works with FieldScout Soil Sensor Reader and WatchDog Weather Stations
- Reads moisture tension from 0 (saturated) to 200 (dry) centibars

6450 Watermark Sensor (with 5' (1.5m) cable)

6450FSADPT Watermark Adapter for Soil Sensor Reader

6450WD Watermark Sensor for WatchDog Stations & Pups (with 11' (3.3m) cable)

6450WD20 Watermark Sensor for WatchDog Stations & Pups (with 25' (7.6m) cable)

6450AH Watermark Adapter for WatchDog Stations & Pups
